

Providing important drugs at the right cost

\$0 out of pocket

The Vital Medication Program eliminates out-of-pocket costs on five key medications for members.

*Effective 1/1/23 for HPN/SHL Group business
(individual is excluded)*

Our ongoing efforts will improve access and make prescription medications more affordable

"High prices are a significant barrier to prescription drugs for many people, so we are using our unique capabilities to deliver savings for consumers."

— Brian Thompson, chief executive officer of UnitedHealthcare

We're eliminating out-of-pocket costs for preferred medications in select categories

Rapid, short and long-acting insulins

Other vital drugs:

- Epinephrine (severe allergic reaction)
- Glucagon (critically low blood sugar)
- Naloxone (opioid overdose)
- Albuterol (acute asthma attack)

What drugs will the \$0 cost share apply to specifically?

The new \$0 cost share applies to the following preferred drugs and applies to both co-pays and deductibles.

- Short-acting and long-acting insulins - diabetes management
- epinephrine - severe allergic reactions
- glucagon - hypoglycemia (critically low blood sugar)
- naloxone - opioid overdoses
- albuterol - acute asthma attacks
